

Moths of Victoria - The Silk Moths

For the first time Victorian moths are being illustrated in a series featuring every recorded species. Silk Moths numbering 85 species begin the series.

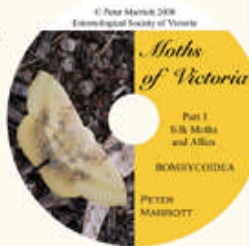

A handy sized booklet figures every species, set to display front and rear wings. As well many species are illustrated in natural positions.

A CD provides over 130 additional pages which contain biology and distributions for each species together with checklists, identification tips and more.

This will become an essential resource for:-

- * Anyone seeking to identify the moths around their homes and countryside.
- * Naturalists, students and scientists.
- * Land Care and 'Friends' groups.
- * Organisations working with the environment.

Part 1 - Silk Moths and Allies - BOMBYCOIDEA

Order Form

Name:

Address:
..... Postcode

Email
